

- Internal Fuses on complete range 30 to 800A
- 100 KA Short Circuit Current (SCCR) up to 600V
- Voltage Supply 480-600-690V
- OLED Display for easy Diagnostic & Configuration
- All Firing & Control Mode available
- Wi Fi and all popular Field Bus available
- APP for communication via Apple or Android<sup>™</sup>
- Remote Service
- Comply with EMC, cULus<sup>®</sup> 508 listed and cUL<sup>®</sup> listed

#### CD AUTOMATION POWERED BY INNOVATION

### **Innovation in Power Control**

www.cdautomation.com Revo C Catalog 2018 Release n.1

# -0.9388

## WITH REVO C "YOU WILL NEVER BE ALONE"

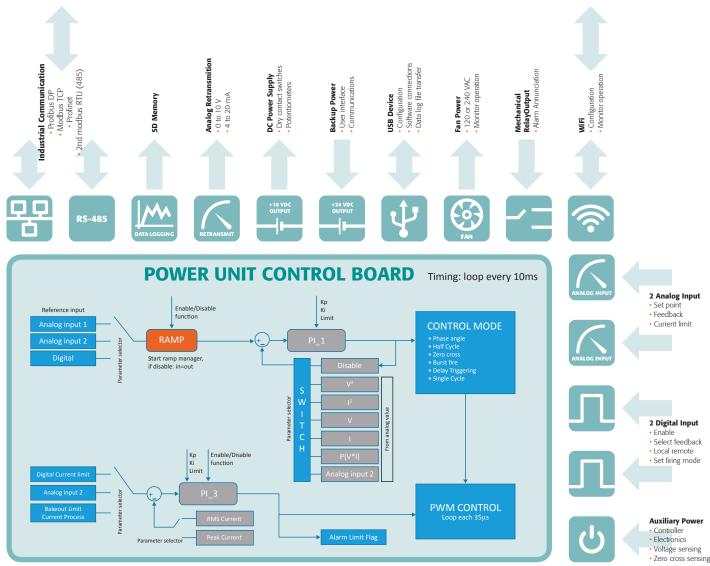

# CD AUTOMATION OFFERS REMOTE SERVICE SUPPORT FROM ANYWHERE IN THE WORLD VIA SMARTPHONE APP.

#### Wide range of communication protocols:

Keep your REVO C connected with the outside world via popular protocols including Modbus<sup>®</sup> RTU, Ethernet TCP, Profibus<sup>®</sup>, Profinet<sup>®</sup> plus WiFi and USB port for local data transfer.

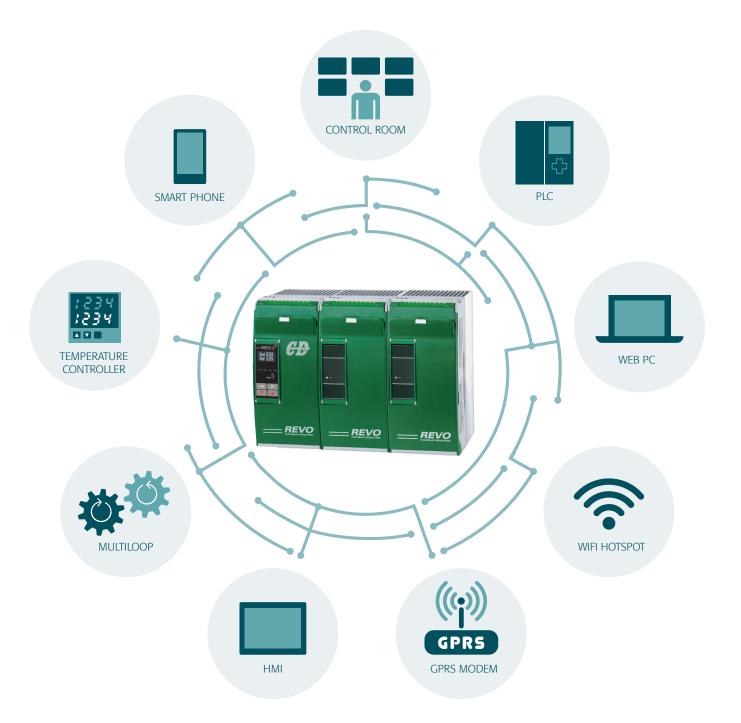

# 1996-25

### **CONNECTIVITY AND CONFIGURATION**

### CD AUTOMATION CONNECT APP Download it Free of Charge

### YOU WILL NEVER BE ALONE... ...WE GIVE YOU OUR REMOTE APP SERVICE!

#### THE CD AUTOMATION APP WILL WORK WITH BOTH APPLE AND ANDROID SYSTEMS

Shown are a few of the most important screen shots that provide key process information, easy product setup and product remote control:

**Remote Control:** From this page you can take control of the process from outside the cabinet:

• Values: Voltage and Current in Engineering units with % Power indication.

Load types include normal and cold resistance plus primary

- Enable and Disable the REVO C.
- Local / Remote facility.

controlled transformer loads.

- % Power (value adjustable).
- Current Limit Set Point.
- Current Limit value in amps and in %.

## 2008.24

### **CONFIGURATOR SOFTWARE**

#### **FAST TUNE**

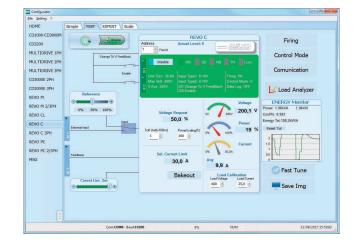

The all new powerful Thyristor Configurator Software allows you to configure all CD Automation products quickly and easily by using the FAST MODE. Simply select your application and the load type picture appears automatically, providing a list of suggested parameter settings. Depending on your application requirements, you can accept or make manual adjustments and when ready, download direct to the thyristor unit.

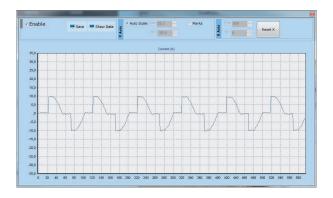

#### **TEST UNIT**

The TEST page is very useful when installing & commissioning CD Automation products as well as finding process issues or fine tuning at a later stage.

You can read, write, enable and disable key values and parameters to test your load. Examples include; reading voltage, current and power values, or current limit status, changing input types between analog or SSR, control (feedback) modes V, I and VxI, or select firing types half cycle, single cycle, burst firing, delayed triggering, phase angle and soft start.

The new 'Load Analyzer' (a small oscilloscope) can be activated from this page, see below.

#### LOAD ANALYZER

Provides real-time information of the output waveform, where you can select up to 10 process variables to help the operator determine if the waveform is in line with process expectations. Also useful for trouble shooting.

#### **PROCESS VARIABLE LOGGING**

In REVO C Storage: 16GB SD Memory Card with programmable Logging Intervals. Estimated storing 10 years.

On other CD Automation Products the logging intervals are a fix value.

## **REVO C FAMILY SIZE AND DIMENSIONS**

REVO Connect is a fully universal product range based upon powerful microprocessor technology. Available from 30A to 800A and single phase (1PH) plus 2PH & 3PH to drive 3 phase loads, its key benefit is its connectivity with the outside world, through Wi-Fi and the most popular Field Bus Protocols. Its universality allows inputs, all firing and control modes to be configured via Smart phone using CD Automation's Connect-APP or via your personal computer and CD Automation's Configurator Software. CD Automation's APP and Configurator Software are available free of charge.

When you buy REVO-C, you also buy CD Automation's experience and know-how to drive your application.

**SR9** H 121 x W 72 x D 185 - 1,15kg.

**SR10** H 121 x W 108 x D 185 - 1,76kg.

SR11 H 121 x W 144 x D 185 - 2,4kg.

**SR12** H 269 x W 93 x D 170 - 3,4kg. **SR15** H 273 x W 93 x D 170 - 3,6kg.

**S17** H 560 x W 411 x D 270 - 51,6kg.

### **FEATURES AND BENEFITS**

### **TRADITIONAL SYSTEM**

#### **REVO C SYSTEM**

#### **REVO C POWER CONTROLLER RANGE**

Current Range from 35 to 800A Controlled Phases 1-2 or 3 Phases suitable to drive Normal Resistance, Cold Resistance and transformers Voltage 480V, 600V and 690V

#### FEATURES AND BENEFITS

Integrated with every REVO-C is the semiconductor fuses, thyristors and current transformers. Designed and built as a single unit not only helps reduce the overall space and labour time to mount and connect separate fuses but also ensures that all testing is carried out correctly and guaranteed to the figures stated. The 100 KA short circuit current rating (SCCR) is very important and complies fully with NEC 110.10 regulation. Full documentation available upon request.

- Robust SCR designed to meet rugged industrial environments
- · Easy access to fuses and thyristors by simply opening front panel door
- · Circuit boards are mounted directly to the front panel door for easy access
- cUL 508 Listed up to 700A included

#### **OUR PRODUCT DIMENSIONS ARE SMALL BECAUSE WE HAVE:**

- Fuses are mounted inside the thyristor unit
- Our heat sinks have a very high efficiency thermal resistance (low value °C/W)
- Internal fuses results in longer heat sinks and increased heat sink efficiency
- Improved air ventilation aids fuse cooling

# 1996 (S. S.)

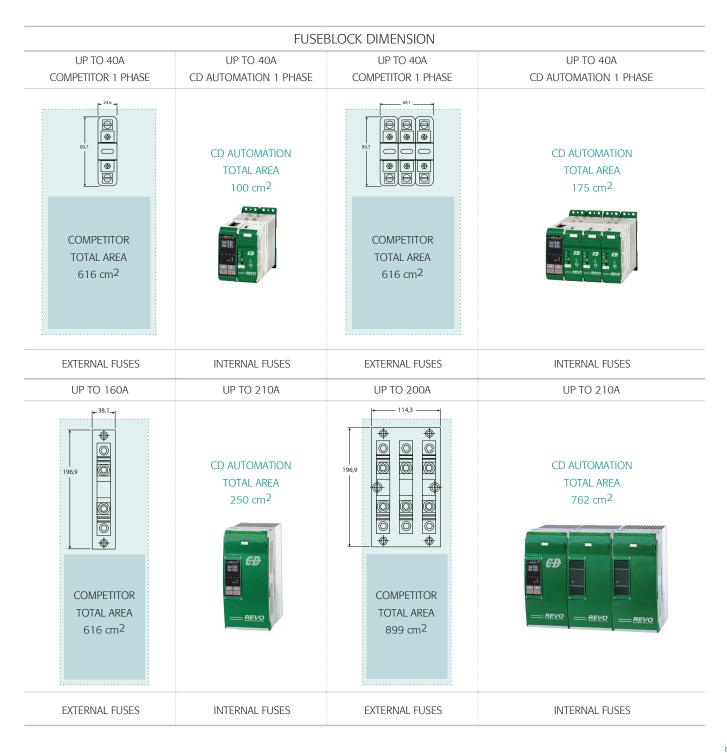

### **THE CHOICE IS INTERNAL OR EXTERNAL FUSES?**

#### **POWER CONTROL UNIT WITH INTERNAL FUSES**

- Up to 60% space saving
- Fuse I2t value selected by CD Automation
- SCCR Approved 100 KA short circuit current rating valid and tested
- Save time for wiring between fuse holder and thyristor power control unit
- Your cabinet become 60% less in dimension and price

#### **POWER CONTROL UNITS WITH EXTERNAL FUSE AND FUSE HOLDER**

- More cabinet space required
- Bigger cabinet, more space required in the factory
- Do you know how much the extra space will cost you?
- If the product dimensions are twice as big, you will need twice the factory space

### **REVO C 1PH**

SIZE SR15

#### **Technical Specification**

- Dimensions: See size and dimensions page 6-7
   Load type: Normal Resistance, Infrared Short, Medium and Long,
- Inputs: Transformer Primary, Cold resistance and SiC elements
   4:20mA, 0:10V, SSR and ModBus as std and different Field Bus Listed in the Product Coding
- Firing mode: Half Cycle, Single Cycle, Burst Firing, Delayed Triggering, Phase Angle with or without Soft Start
- Control Mode:
- Communication:
- USB:

DUAL LINE

ication: RS485 port. RTU Modbus® Protocol and other Field Bus available port integrated for configuration in safety mode (No Load and Auxiliary Voltage needed) Unit Powered Through USB Short Circuit Current rating (SCCR) up to 600V

Voltage, Current and Power or V2 and I2 with additional Transfer to VxI

- 100 KA: Short Circuit Current rating (SCCR) up to 600V
   Approvals: Comply with EMC, cUL us® 508 listed and cUL® listed
- Dual Current Limit: for peak and RMS value

SIZE S12

#### Option

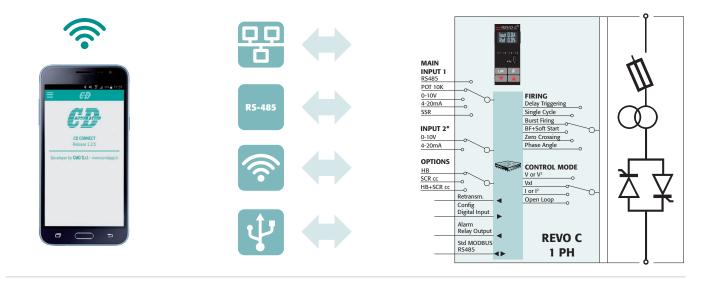

- See below the types of options and their combination for Code generation
- Energy Totalizer
- Data Logging
- WiFi
- HB Alarm to diagnose partial or Total Load Failure and Thyristor Short Circuit

#### Tools

- A very easy and Powerful Configurator Software is available
   Free of Charge on www.cdautomation.com
- CD Automation APP is also available free of charge to communicate via Wi-Fi

4:20mA, 0:10V, SSR and Modbus® as std and different

port integrated for configuration in safety mode

Comply with EMC, cUL us® 508 listed and cUL® listed

Burst Firing, Delayed Triggering and Phase Angle with or without Soft Start

Voltage, Current and Power or V2 and I2 with additional Transfer to VxI

RS485 port. RTU Modbus® Protocol and other Field Bus available

(No Load and Auxiliary Voltage needed) Unit Powered Through USB

Field Bus Listed in the Product Coding

- Normal Resistance, Infrared Short, Medium and Long, Transformer · Load type: Primary using Phase Angle, Cold resistance and SiC elements
- Inputs:
- Firing mode:
- Control Mode:
- Communication:
- USB:
- Approvals:
- 100 KA:
- Short Circuit Current rating (SCCR) up to 600V • Dual Current Limit: for peak and RMS value

### Option

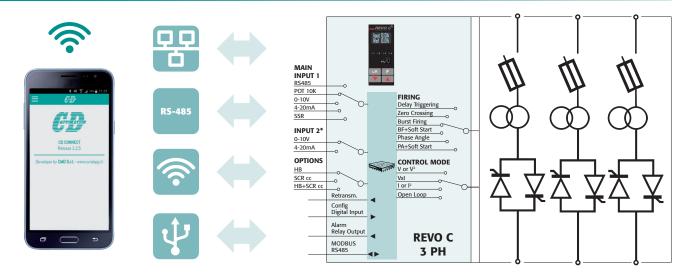

- See below the types of options and their combination for Code generation
- Energy Totalizer
- Data Logging
- WiFi
- HB Alarm to diagnose partial or Total Load Failure and Thyristor Short Circuit

#### **Tools**

- A very easy and Powerful Configurator Software is available Free of Charge on www.cdautomation.com
- · CD Automation APP is also available free of charge to communicate via Wi-Fi

I LIMIT	HB	WIFI	LOGGING	TOTALIZER	CODE	NOTES
					0	
					1	
					2	
					3	I LIMIT (CURRENT LIMIT) This option is used to keep the overcurrent
					4	
					5	inside setted limit. It's necessary to drive primary transformers and cold
					6	resistance. This option is not available on 30-35-40A units.
					7	
					8	HB Alarm for partial or total load failure and Short Circuit on SCR
					9	(relay output).
					A	
					В	
					С	WiFi Option that allows communication with a smart phone. From
					D	your smart phone via the CD Automation App, direct to your thyristor
					E	unit in the cabinet to read current, voltage, power and energy
					F	totalization as well as the ability to change parameters to improve
					G	, , , , , , , , , , , , , , , , , , , ,
					н	process and product quality without opening the cabinet door.
					I	
					J	<b>APP</b> Free of charge download it from Google Play or Apple Store.
					к	
					L	DATA LOGGER This feature is important to see the historical data
					М	·
					N	of parameter like Current, Voltage and Power and can be useful to
					0	diagnose a fault.
					Р	
					Q	<b>ENERGY TOTALIZER</b> This function totalize the energy consumption
					R	of the load allowing the calculation cost of heat treatment.
					S	of the load allothing the calculation cost of near department.
					Т	
					U	
					V

## **GENERAL FEATURES**

Dis		
	play Software	
0.1	OLED display on front Unit	This display improves the operator interface and delivers use-friendly intuitive messages
0.2	Diagnostic	Powerful diagnostics provides clear alarm notification in plain English on the OLEI display
0.3	Fully Software Configurable	REVO C is fully Software configurable
0.4	Layer based Firmware	Layered software design means that new application or customer software can be written without a complete software debug, resulting in faster upgrades and a stable platform
Elec	trical Features	
1.1	Current rating	30 to 800A for 1-2-3 Phase unit
1.2	Voltage	480-600-690V 690V only available for unit $\geq$ 60 A
1.3	Integrated Fuse	This reduce labor and space and gives the possibility to use a part of fan cooling air to reduce the temperature of semiconductor fuses and reduce the mounting space inside the cabinet (see the comparison at page 9)
1.4	Quick and easy access to Fuses	Fuses and thyristors are mounted directly behind the front panel door
1.5	100 KA Short Circuit Current rating (SCCR) up to 600V	Enable greater protection in case of Short Circuit
Firi	ng & Control Mode	
2.1	Universal firing mode	Half Cycle, Single Cycle, Burst Firing, Delayed Triggering Phase Angle and Soft Star
2.2	Current Control	This feature is always available for both RMS and peak Control
2.3	Voltage Control	Normally used when Voltage Control Mode is selected
2.3	Voltage Control Power Control	Normally used when Voltage Control Mode is selected Normally used when Power Control Mode is selected
2.4		
2.4	Power Control	Normally used when Power Control Mode is selected
2.4	Power Control Universal Input	Normally used when Power Control Mode is selected The std analog inputs 4:20mA and 0:10V and SSR Configurable via Software
2.4 2.5 2.6 2.7	Power Control Universal Input Universal Control Mode	Normally used when Power Control Mode is selected The std analog inputs 4:20mA and 0:10V and SSR Configurable via Software REVO C can be configured for Current, Voltage Power feed back or open loop
2.4 2.5 2.6 2.7	Power Control Universal Input Universal Control Mode External Feed Back	Normally used when Power Control Mode is selected The std analog inputs 4:20mA and 0:10V and SSR Configurable via Software REVO C can be configured for Current, Voltage Power feed back or open loop
2.4 2.5 2.6 2.7 <b>Con</b>	Power Control Universal Input Universal Control Mode External Feed Back munication	Normally used when Power Control Mode is selected The std analog inputs 4:20mA and 0:10V and SSR Configurable via Software REVO C can be configured for Current, Voltage Power feed back or open loop External selection of the Control Mode (Feedback) via 0-10V signal

## **GENERAL FEATURES**

3.4	Modbus® TCP	Option
3.5	Profibus®	Option
3.6	Profinet®	Option
3.7	USB device on front unit for configuration	Standard easily and safety normally used to configure the REVO C Eliminate the user having to work in a high voltage environment because the unit is powered through USB connection
Extr	a Features	
4.1	Integrated Data Logging	Storage: 16GB SD Memory Card with programmable Logging Intervals Optional 40GB SD memory card available
4.2	Energy Counter Totalizer	Available as an option to define the cost per hour of the heating system
4.3	Special Algorithm for Short Wave form IR Lamp	Using half cycle firing and soft start curve to minimize lamp flickering
4.4	Remote service	Available when Wi-Fi and Smart Phone selected Use it and "You will never be alone"
4.5	Automatic Selection of the configuration as a function of wiring and load type	Automatically select the correct parameters for your application by using the wiring and load type icons via your smart phone or PC configuration software
4.6	HB and Sc Alarm	Alarm for Partial or Total Load Failure and Short Circuit on SCR with Electromechanical Relay output 1A at 30 Vdc or 0,5A at 125 Vac
4.7	Heater Bakeout	Protects heater elements on start-up by eliminating problems caused by moisture ingress
4.8	High precision measurement (True RMS Value for V,I and VxI)	≤1%
4.9	Integrate Load Analyzer	Helps the operator to see possible load problems with live Wave Form monitoring
4.10	Free configuration Software	Easy to use and powerful Configurator Software, available free of charge from www.cdautomation.com
Gen	eral Features and Approvals	
5.1	Industry-leading and Serviceability	Generous sizing of Thyristors and Thermal Parts using high efficency Heatsink
5.2	Enable troubleshooting with helpful thermal system diagnostics	Internal temperature sensor detects over-current or high cabinet temperature and raises alarm. If high temperature continues a second high limit alarm powers down the thyristor unit
5.3	Fully compatible with REVO M and REVO CL series	Fully upgrade & substitute existing REVO M and REVO CL units using the same terminal blocks and wiring
5.4	Approvals	CE-EMC and cUL us <sup>®</sup> 508 Listed for 1-2 Phase up to 700A and 500A for 3 Phase 480-600V versions is available on request CE-EMC only for 800A 1-2-3 Phase Unit and all 690V Units. See the tab at page 6 for more details
